Subject: Re: Delaware family who where Hospitalized

We plan to finish sampling the J building tomorrow morning. However, we do have preliminary (unvalidated) analytical results from SUMMAs taken on Tuesday. They show the presence of Methyl Bromide in the 1 ppm range for the Capri unit. Note that this is still preliminary and subject to change after validation. Of course, share with local doctors, but please do not otherwise make public until the process works itself out. We are trying to expedite as much as possible, but the lab turnaround times are in play. We can also work through ATSDR to keep the doctors apprised of any developments.

Understood on the retrieval/decon of the computers and other personal effects.

I am cc'ing Cris D'Onofrio in case I am out of loop and you need to contact us, plus I believe he is going to provide additional information on the personal items.

Geoff

> Thank you and the entire team. The local doctors want to know if you found any other COCs.? The boys are all still in Comas. The family wanted the phones and computers, only if you guys decontaminate them. I can only pray to god they will be able to use them again. Again, thanks to the entire team. U.S. E.P. A. is great.

>> Good evening. I am one of the police officers in Virgin Islands who located Mr Esmond Stevens in his villa after he was able to walk out of the hospital without being discharged. I remained in the villa for at least one half hour and was able to capture a few seconds of video footage with Mr. Stevens experiencing

convulsions. I will be visiting a doctor for a thorough examination since we (officers) were sent into an unknown environment without protective gear and could be at risk with what was alleged to have affected Mr. Esmond and his family. Send the family my regards and let them know that I am praying for their speedy recovery. Should you need any further information you can contact me at this email. Thank you
